

H2O on the Go! Pre/Post Test

- 1) What is the process of water seeping through the ground?
 - a. Percolation
 - b. Respiration
 - c. Precipitation
 - d. Condensation

- 2) How much water is available for us to use as fresh water?
 - a. 20%
 - b. 5%
 - c. 10%
 - d. 1%

- 3) What is ground water?
 - a. Water that is found in the ocean
 - b. Water that is found in puddles
 - c. Water that is found underground in cracks, spaces in soil, sand, clay, and rock
 - d. All of the above

- 4) What is the manmade way for water to leave the aquifer?
 - a. Spring
 - b. Well

- 5) What is surface water?
 - a. The water we find in rivers, lakes, streams, and creeks
 - b. The water that we find underground
 - c. Aquifers
 - d. None of the above

- 6) What is the process for turning salt water into fresh water?
- Transpiration
 - Desalination
 - Percolation
 - Condensation
- 7) Point source pollution is defined as _____
- Good pollution
 - Landfills
 - Any single identifiable source of pollution (e.g. pipe)
 - Run off
- 8) Non-point source pollution is defined as _____
- Any single identifiable source of pollution (e.g. pipe)
 - A result of runoff. When rain moves over and through the ground and the water absorbs pollutants it comes in contact with.
- 9) The United States uses more water than any other place on Earth.
- True
 - False
- 10) Which of the following demonstrates water conservation?
- Taking long showers
 - Washing your fruits and vegetables under running water
 - Cleaning your driveway with a hose
 - Turning the water off when you brush your teeth
